Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art references do not disclose all of the features of claims 1-28.

Regarding claim 1, prior art references do not disclose a means of generating a second comparison-result data based on first comparison-result. Prior art references fail to teach of a second calculation means responsive to hue data, first comparison-result data, second comparison-result and coefficients from coefficient storage means for calculating a second set of three colors, which includes matrix calculation performed on at least the hue data, first comparison-result data, second comparison-result and coefficients from coefficient storage means.

Regarding claim 19, prior art references do not disclose means of generating a second comparison-result data based on first comparison-result. Prior art references fail to teach of a second calculation means for performing calculations including matrix calculation on at least the hue data, first comparison-result data, second comparison-result and coefficients from coefficient storage means comprising of producing a color conversion device in which the coefficients are not stored in the coefficient storage means and writing the coefficients in the coefficient storage means on the basis of the characteristics of the input and output device.

Regarding claim 20, prior art references do not disclose a second calculation term generator for generating second calculation terms, which are effective for one of the inter-hue regions between the six hues. Prior art references fail to teach of a matrix

calculator using the matrix coefficients stored in the coefficient storage and second calculation terms.
